Maya Okafor

Product Designer · Interaction & Visual Design

Portland, OR · maya.okafor@example.com · mayaokafor.example.com · (555) 010-2468

SUMMARY

Product designer with four years of experience shaping mobile and web products from research to launch. I like turning messy workflows into calm, clear interfaces, and I work closely with engineers to ship polished details. Looking for a senior role on a small team building tools people use every day.

EXPERIENCE

Product Designer, Fernleaf Health

Remote · Mar 2023 – Present

- Redesigned the appointment booking flow; completion rose from 61% to 78% in three months.
- Led discovery interviews with 24 clinic staff and turned findings into a shared journey map.
- Built the first version of the Fernleaf design system (48 components) in Figma and Storybook.
- Partnered with two engineers to ship accessible forms that pass WCAG 2.2 AA.

UX Designer, Brightline Transit

Portland, OR · Jun 2021 – Feb 2023

- Designed real-time arrival screens for 140 bus shelters; tested prototypes with riders on site.
- Simplified the trip planner from five steps to two, cutting support tickets by a third.
- Ran weekly design critiques and created the team's research repository.

Design Intern, Studio Kettle

Seattle, WA · Summer 2020

- Produced brand identities and websites for three local non-profits.

EDUCATION

B.F.A. Interaction Design, Cascadia College of Art · 2021

Thesis: designing wayfinding for people with low vision

SELECTED PROJECTS

Fernleaf booking redesign

Case study · mayaokafor.example.com/fernleaf

Rebuilt booking around the question patients actually ask first, "when can I be seen?", instead of choosing a clinician first. Shipped in three releases with weekly usability tests.

Shelter arrival screens

Case study · mayaokafor.example.com/brightline

High-contrast, glanceable arrival boards readable from six metres in rain and sun. Included an audio button for riders with low vision.

Side project: Pantry

iOS app · 2,000 monthly users

A grocery list that sorts itself by store aisle. Designed and built in SwiftUI over a summer.

SKILLS

Design

- Interaction & visual design
- Design systems
- Prototyping (Figma, ProtoPie)
- Accessibility (WCAG)

Research

- Interviews & usability tests
- Journey mapping
- Survey design

Build

- HTML, CSS, basic React
- SwiftUI
- Storybook

AWARDS

Core77 Design Awards, Student Notable (2021) · Brightline "Rider First" team award (2022)
